

## A of B and C D E to F

The actual statement:

Real-time data (bus location/tracking data, time reference data for time-stamping of all SmartBus events, and the provision of this location and time reference data to external systems as required)

The statement could pair up around the AND in various ways:

(Provision OF location) AND (data TO external systems)

The TO can link to “provision” actively (and fits), rather than “data” passively, making this unlikely

Provision OF (location AND time reference data) TO external systems

This fits better than the others

(location AND time) reference data - possible

(location AND time reference) data - as we already have a reference to location data in the same sentence, we can stop at this one.

(location AND time reference data) – possible, but this is parenthetical statement about data – we should know context

## Other Clues

“this” is adjacent to location, but the subject (before the bracket) is data, so making it “this data” would simplify the structure.

## **Establishment of Group**

There are four possible groups that could be established:

Provision AND data

Location AND data

Location AND time reference

Location AND time

## **Groupings**

A OF B AND C TO D

A OF B TO C AND D

A OF B TO C AND D TO E

A AND B TO C

A OF B, C AND D TO E
